

Sleep technologist certification requirements

Your Mission and ours align

To protect the public and to
ensure commerce through
licensing and regulation

Current Credentialing

- American Board of Sleep Medicine
- Board of Registered Polysomnographic Technologists
- National Board of Respiratory Care

Why current credentialing is not enough for tech certification

- Utah only has about 20 % of our techs either registered or certified with our national governing boards .
- There are not enough registered technologists to fulfill the ever-growing demand in Utah sleep labs and a higher standard must be in place.

How will having a license category for sleep technicians help

Ensure patient safety, optimal standards of care and improve outcomes for Utahns seeking treatment for their sleep problems.

Supporting organizations/individuals for licensure of sleep technologists

The University of Utah

American Association of Sleep Technologists

Granger Medical Center

Revere Health

Earl Fulcher, RRT –Director of Respiratory and Sleep Medicine

Krishna Sundar, M.D- Medical Director- Sleep Wake Center
